Canadian Data Report of Fisheries and Aquatic Sciences No. 451

84-4181/

Canadian Data Report of Fisheries and Aquatic Sciences

These reports provide a medium for filing and archiving data compilations where little or no analysis is included. Such compilations commonly will have been prepared in support of other journal publications or reports. The subject matter of Data Reports reflects the broad interests and policies of the Department of Fisheries and Oceans, namely, fisheries management, technology and development, ocean sciences, and aquatic environments relevant to Canada.

Numbers 1-25 in this series were issued as Fisheries and Marine Service Data Records. Numbers 26-160 were issued as Department of Fisheries and the Environment, Fisheries and Marine Service Data Reports. The current series name was changed with report number 161.

Data Reports are not intended for general distribution and the contents must not be referred to in other publications without prior written clearance from the issuing establishment. The correct citation appears above the abstract of each report.

Rapport statistique canadien des sciences halieutiques et aquatiques

Ces rapports servent de base à la compilation des données de classement et d'archives pour lesquelles il y a peu ou point d'analyse. Cette compilation aura d'ordinaire été préparée pour appuyer d'autres publications ou rapports. Les sujets des Rapports statistiques reflètent la vaste gamme des intérêts et politiques du Ministère des Pêches et des Océans, notamment gestion des pêches, techniques et développement, sciences océaniques et environnements aquatiques, au Canada.

Les numéros 1 à 25 de cette série ont été publiés à titre de Records statistiques, Service des pêches et de la mer. Les numéros 26-160 ont été publiés à titre de Rapports statistiques du Service des pêches et de la mer, Ministère des Pêches et de l'Environnement. Le nom de la série a été modifié à partir du numéro 161.

Les Rapports statistiques ne sont pas préparés pour une vaste distribution et leur contenu ne doit pas être mentionné dans une publication sans autorisation écrite préalable de l'établissement auteur. Le titre exact paraît au haut du résumé de chaque rapport.

** Letters ND indicate that angling data were not obtained in 1981.

ABSTRACT

Moores, R. B., and E.G.M. Ash. 1984. Angled catch and effort data for Atlantic salmon in Newfoundland and Labrador, and for other fishes in Labrador, 1981. Can. Data Rep. Fish. Aquat. Sci. 451: 88 p.

An increase in fishing effort and ideal angling conditions combined with an apparent increased abundance of grilse, resulted in a record number of Atlantic salmon taken in the recreational fishery in Newfoundland and Labrador in 1981. Anglers took approximately 53,750 salmon comprised of 51,861 grilse and 1889 large salmon. Fishing effort totalled 127,674 rod days; the highest amount of effort ever recorded for the fishery. Catch per unit effort was 0.42, compared to 0.39 in 1980 and 0.37 for the 1976-80 mean CPUE. Total catch for insular Newfoundland was up by 27% from 1980. This resulted from the increased grilse catch. The large salmon catch was down by 29% from the 1980 catch and 13% lower than the 1976-80 mean large salmon catch. The recreational salmon fishery in Labrador in 1981 was also at record levels. There were 5191 grilse and 520 large salmon recorded angled but an unconfirmed additional 1400 grilse and 250 large salmon were reported to have been taken but these were not recorded. Angling effort in Labrador was comparable to previous years but the CPUE of 1.10 was the highest in thirteen years. Angling conditions were reported to be excellent on Labrador rivers.

RÉSUMÉ

Moores, R. B., and E.G.M. Ash. 1984. Angled catch and effort data for Atlantic salmon in Newfoundland and Labrador, and for other fishes in Labrador, 1981. Can. Data Rep. Fish. Aquat. Sci. 451: 88 p.

Une augmentation de l'effort de pêche et des conditions idéales de pêche à la ligne ainsi qu'une hausse apparente de l'abondance de madeleineaux ont entraîné des prises records de saumons de l'Atlantique par les pêcheurs sportifs à Terre-Neuve et au Labrador en 1981. Les pêcheurs à la ligne ont capturé environ 53 750 poissons dont 51 861 madeleineaux et 1 889 gros saumons. L'effort de pêche totalisait 127 674 jours de pêche à la ligne, soit le plus gros effort jamais déployé dans cette pêche. La prise par unité d'effort s'élevait à 0,42 par rapport à 0,39 en 1980 et à 0,37 pour le période 1976-80 (PUE moyenne). La prise totale pour l'île de Terre-Neuve a augmenté de 27% comparativement à 1980, augmentation imputable à une prise supérieure de madeleineaux. La prise de gros saumons a baissé de 29% par rapport à 1980 et de 13% par rapport à la moyenne pour la période 1976-80. Au Labrador, la pêche sportive a aussi atteint des niveaux records en 1981. Selon les rapports, 5 191 madeleineaux et 520 gros saumons ont été capturés; de plus, la prise de 1 400 madeleineaux et de 250 gros saumons a été signalée mais non enregistrée. L'effort de pêche à la ligne au Labrador était semblable aux années précédentes mais la PUE (1,10) était la plus élevée en treize ans. Les conditions de pêche à la ligne etaient, semble-t-il, excellentes dans les rivières du Labrador.

PART I

Atlantic Salmon, Insular Newfoundland and Labrador

INTRODUCTION

This is the ninth annual angling data report published since 1973 by the Freshwater and Anadromous Fish Program (Button and Wells 1974, 1975; Moores 1976; Moores et al. 1977, 1978; Moores and Tucker 1978, 1979, 1980; Moores and Ash 1981). The data are provided by the Resource Management Branch, Department of Fisheries and Oceans, Newfoundland Region. Data include both an observed or known fishing effort and catch, and an estimated quantity. Observed census data are normally collected by seasonal river guardians during surveillance of the annual Atlantic salmon recreational fishery. Data are submitted to the fisheries officer or warden who, in consultation with the guardian, estimates the catch and effort that occurred but were not observed. Normally factors such as manpower, patrol time, angling pressure, weather, river conditions and personal knowledge of the salmon migration are used to determine the estimated quantities. Angling pressure and accessibility to the rivers had increased to such a degree during the 1970's that observation and recording of total effort and angling catch had become impossible. The addition of the estimated quantity was incorporated into the angling data in 1974 to provide consistency in the reporting.

This report also includes calculated catch-per-unit-effort (CPUE). The CPUE, defined as the number of fish angled per rod day (a rod day being a day or any part thereof in which an individual angles) is one of the important tools used to assess the condition of not only the total Atlantic salmon stock, but individual populations as well. It is especially valuable for early detection of declines in fish populations that would otherwise appear healthy from high catch statistics which are disguised by increases in effort.

The format of the 1981 report is similar to that of previous years. Data are presented by rivers, statistical sections, statistical areas and Fishing and Industry Areas (Fig. 1 and 2). Rivers are tabulated according to their assigned seven digit code (Waldron 1974) which commence at Cape Norman on the northern tip of the Great Northern Peninsula and proceed consecutively and clockwise around insular Newfoundland and into Labrador. The seven digit codes, developed for quick identification and location of rivers as well as for computer coding, denote not only the individual river numbers but also the statistical section (developed by the Economics Branch in 1968) in which the mouth of the river is located. For example: Humber River is coded 4402430. The number 44 indicates the statistical section and the 02430 is the individual river number.

Data are broken down by weekly effort and catch and include number of grilse (< 2.7 kg), number of salmon (> 2.7 kg), and weight of largest fish caught. Angled catch represents only upstream migrants or bright salmon. There is no kelt or black salmon fishery in Newfoundland or Labrador.

The season for Atlantic salmon angling in Nfld. and Labrador extends from June 10 to Sept. 15. However, because the timing of migration differs considerably on some rivers and to ensure that adequate spawners reach the spawning grounds, the opening and closing dates vary. Open season for all scheduled rivers for 1981 is in Table 1.

Scheduled salmon rivers may have to be closed periodically for reasons such as low water, research, enhancement, conservation, etc. This requires changes to the Newfoundland Fishery Regulations. These notices of change are "Variation Orders". During 1981 the following variation orders were issued.

Notice

1. St. Genevieve River System

For the conservation of trout and salmon, the fishing for trout and immature salmon is prohibited during the period beginning on January 15, 1981 and ending on June 19, 1981 in the waters of Ten Mile Lake, Round Lake, and all tributaries flowing into Ten Mile Lake and Round Lake in the Province of Newfoundland.

Coming Into Force

This Notice shall come into force on the 15 day of January, 1981 and remain in force until the 19 day of June, 1981.

Variation

2. Northwest Gander River System

The closed time as fixed by subsection 13(2) of the Newfoundland Fishery Regulations and set out in Item I of Schedule III thereto is herby varied so that no person shall angle in that system of ponds and connecting streams that flow into Little Gull Lake from the southeast from the headwaters of that system to but not including Little Gull Lake and Little Gull River which flows into Northwest Gander River during the period beginning on January 1 and ending on December 31.

Coming Into Force

This Order shall come into force on the 1 day of April, 1981 and remain in force until revoked.

Variation

3. Flat Bay Brook

The closed time for the salmon river "Flat Bay Brook" (Item 8 of Schedule I) as fixed by paragraph 13(2)(b) of the Newfoundland Fishery Regulations and set out in Item 5 of Schedule III thereto is hereby varied so that no person shall angle in Flat Bay Brook or its tributary streams during the period September 1 to June 19.

4. Fox Island River

The closed time for the salmon river "Fox Island River" (Item 12 of Schedule I) as fixed by paragraph 13(2)(b) of the Newfoundland Fishery Regulations and set out in Item 7 of Schedule III thereto is hereby varied so that no person shall angle in Fox Island River or its tributary streams during the period July 20 to July 5.

5. Humber River

The closed time for the salmon river "Humber River" (Item 15 of Schedule I) as fixed by paragraph 13(2)(b) of the Newfoundland Fishery Regulatons and set out in Item 1 of Schedule III thereto is herby varied so that no person shall angle in that part of the "Humber River" known as the Upper Humber and lying upstream from the upper end of Deer lake to its source including all tributary streams other than those flowing into Adies Lake during the period September 1 to June 9.

Coming into Force

This Order shall come into force on the 22 day of May, 1981.

Variation

6. Colinet River

The closed time as fixed by subsection 13(2) of the Newfoundland Fishery Regulations and set out in Item 1 of Schedule III thereto is hereby varied so that no person shall angle in the Colinet River including the north and east branches (Item 103 of Schedule I) during the period beginning on June 20, 1981 and ending on June 19, 1982.

Coming Into Force

This Order shall come into force on the 20 day of June, 1981, and remain in force until June 19, 1982.

Variation

7. Forteau River

The closed time for the salmon river "Forteau River" (Item 156 of Schedule I of the said Regulations) as fixed by paragraph 13(2)(b) of the Newfoundland Fishery Regulations and set out in Item 2 of Schedule III thereto is hereby varied so that no person shall angle in the Forteau River from its mouth upstream to the Bridge during the period September 16 to June 11.

8. Pinware River

The closed time for the salmon river "Pinware River" (Item 157 of Schedule I of the said Regulations) as fixed by paragraph 13(2)(b) of the Newfoundland Fishery Regulations and set out in Item 2 of Schedule III thereto is hereby varied so that no person shall angle in the Pinware River from its mouth upstream to the junction with Trout River during the period September 16 to June 11.

Coming Into Force

This Order shall come into force on the 12 day of June, 1981.

Variation

9. Exploits River

The closed time for the salmon river "Exploits River" (Item 67 of Schedule I of the said Regulations) as fixed by paragraph 13(2)(b) of the Newfoundland Fishery Regulations and set out in Item 1 of Schedule III thereto is hereby varied so that no person shall angle in the Exploits River from the lower entrance of the fishway at Grand Falls downstream to the junction of the Exploits River and Stony Brook during the period July 10, 1981 to August 31, 1981.

Coming Into Force

This Order shall come into force on the 10 day of July, 1981.

Variation

10. West River (St. Barbe)

The closed time for the salmon river "West River (St. Barbe)" (Item 31 of Schedule I) as fixed by paragraph 13(2)(b) of the Newfoundland Fishery Regulations and set out in Item 1 of Schedule III thereto is hereby varied so that no person shall angle in West river (St. Barbe) during the period July 15 to June 19.

11. East River (St. Barbe)

The closed time for the salmon river "East River (St. Barbe)" (Item 31 of Schedule I) as fixed by paragraph 13(2)(b) of the Newfoundland Fishery Regulations and set out in Item 1 of Schedule III thereto is hereby varied so that no person shall angle in East river (St. Barbe) during the period July 15 to June 19.

12. Big Brook (St. Barbe)

The closed time for the salmon river "Big Brook (St. Barbe)" (Item 31 of Schedule I) as fixed by paragraph 13(2)(b) of the Newfoundland Fishery Regulations and set out in Item 1 of Schedule III thereto is hereby varied so that no person shall angle in Big Brook (St. Barbe) during the period July 15 to June 19.

13. Parker River (Pistolet Bay)

The closed time for the salmon river "Parker River (Pistolet Bay)" (Item 35 of Schedule I) as fixed by paragraph 13(2)(b) of the Newfoundland Fishery Regulations and set out in Item 1 of Schedule III thereto is hereby varied so that no person shall angle in Parker River (Pistolet Bay) during the period July 15 to June 19.

Coming Into Force

This Order shall come into force on the 14 day of July, 1981.

Variation

14. Torrent River System

The closed time for the salmon river "Torrent River" (Item 28 of Schedule I) as fixed by paragraph 13(2)(b) of the Newfoundland Fishery Regulations and set out in Item 7 of Schedule III thereto is hereby varied so that no person shall angle in Torrent River and tributary streams during the period September 1 to July 17.

Coming Into Force

This Order shall come into force on the 17 day of July, 1981.

Variation

15. East River (Hawkes Bay)

The closed time for the salmon river "East River, Hawkes Bay" (Item 27 of Schedule I) as fixed by paragraph 13(2)(b) of the Newfoundland Fishery Regulations and set out in Item 1 of Schedule III thereto is hereby varied so that no person shall angle in East River, Hawkes Bay during the period July 16 to June 19.

16. Harry's River (Southwest Feeder)

The closed time for the salmon river "Southwest Feeder" (Item 29 of Schedule I) as fixed by paragraph 13(2)(b) of the Newfoundland Fishery Regulations and set out in Item 1 of Schedule III thereto is hereby varied so that no person shall angle in Southwest Feeder during the period July 16 to June 19.

Coming Into Force

This Order shall come into force on the 15 day of July, 1981.

Variation

17. West River (Halls Bay)

The closed time for the salmon river "West River (Hall's Bay)" (Item 58 of Schedule I) as fixed by paragraph 13(2)(b) of the Newfoundland Fishery Regulations and set out in Item 1 of Schedule III thereto is hereby varied so that no person shall angle in Barney's Brook, a tributary of West River, From Barney's Lower Falls upstream to Red Cliff during the period July 29, 1981 to August 31, 1981.

18. South Brook (Halls Bay)

The closed time for the salmon river South Brook (Hall's Bay) (Item 59 of Schedule I) as fixed by paragraph 13(2)(b) of the Newfoundland Fishery Regulations and set out in Item 1 of Schedule III thereto is hereby varied so that no person shall angle in South Brook, a tributary of West River, from Barney's Lower Falls upstream to Red Cliff during the period July 29, 1981 to August 31, 1981.

19. Western Arm River

The closed time for the salmon river Western Arm River (Item 62 of Schedule I) as fixed by paragraph 13(2)(b) of the Newfoundland Fishery Regulations and set out in Item 1 of Schedule III thereto is hereby varied so that no person shall angle in Western Arm River during the period July 29, 1981 to August 31, 1981.

20. Peter's River (Bay of Exploits)

The closed time for the salmon river Peter's River (Bay of Exploits) (Item 64 of Schedule I) as fixed by paragraph 13(2)(b) of the Newfoundland Fishery Regulations and set out in Item 1 of Schedule III thereto is hereby varied so that no person shall angle in Peter's River, Bay of Exploits, during the period July 29, 1981 to August 31, 1981.

21. Northern Arm River (Bay of Exploits)

The closed time for the salmon river Northern Arm River (Bay of Exploits) (Item 65 of Schedule I) as fixed by paragraph 13(2)(b) of the Newfoundland Fishery Regulations and set out in Item 1 of Schedule III thereto is hereby varied so that no person shall angle in Northern Arm River, Bay of Exploits, during the period July 29, 1981 to August 31, 1981.

22. Charles Brook (Bay of Exploits)

The closed time for the salmon river Charles Brook (Bay of Exploits) (Item 66 of Schedule I) as fixed by paragraph 13(2)(b) of the Newfoundland Fishery Regulations and set out in Item 1 of Schedule III thereto is hereby varied so that no person shall angle in Charles Brook, Bay of Exploits, during the period July 29, 1981 to August 31, 1981.

23. Exploits River

The closed time for the salmon river Exploits River (Item 67 of Schedule I) as fixed by paragraph 13(2)(b) of the Newfoundland Fishery Regulations and set out in Item 1 of Schedule III thereto is hereby varied so that no person shall angle in Stoney Brook and Jumpers Brook, tributaries of the Exploits River, during the period July 29, 1981 to August 31, 1981.

24. Gander River (Salmon Brook)

The closed time for the salmon river Gander River (Salmon Brook) (Item 71 of Schedule I) as fixed by paragraph 13(2)(b) of the Newfoundland Fishery Regulations and set out in Item 1 of Schedule III thereto is hereby varied so that no person shall angle in Salmon Brook, a tributary of the Gander River, during the period July 29, 1981 to August 31, 1981.

Coming Into Force

This Order shall come into force on the 29 day of July, 1981, and remain in force until the 31 day of August, 1981, at which time the closed times varied by this Order will be as set out in Item 1 of Schedule III to the said regulations.

Variation

Sections 5 and 6 of the Newfoundland Region Closed Time Variation Order, 1981-64 are revoked.

25. Peters River (Bay of Exploits)

The closed time for angling in the salmon rivers Peter's River, Bay of Exploits) (Item 64 of Schedule I of the said Regulations) and Northern Arm River, Bay of Exploits (Item 65 of Schedule I of the said Regulations) shall be as set out in Item 1 of Schedule III to the said Regulations, September 1 to June 19.

Coming Into Force

This Order shall come into force on the 12 day of August, 1981.

Variation

Section 4 of the Newfoundland Region Closed Time Variation Order, 1981-64 is revoked.

26. Western Arm River (Bay of Exploits)

The closed time for angling in the salmon river Western Arm River (Item 62 of Schedule I of the said Regulations) shall be as set out in Item 1 of Schedule III to the said Regulations, September 1 to June 19.

Coming Into Force

This Order shall come into force on the 15 day of August, 1981.

Variation

Sections 2 and 3 of the Newfoundland Region Closed Time Variation Order, 1981-64 are revoked.

27. West River (Hall's Bay)

The closed time for angling in the salmon river, West River (Hall's Bay), including Rowsell's and Barney's Brooks (Item 58 of Schedule I of the said Regulations) and South Brook (Hall's Bay) including tributary streams (Item 59 of Schedule I of the said Regulations) shall be as set out in Item I of Schedule III to the said Regulations, September 1 to June 19.

Coming Into Force

This Order shall come into force on the 20 day of August, 1981.

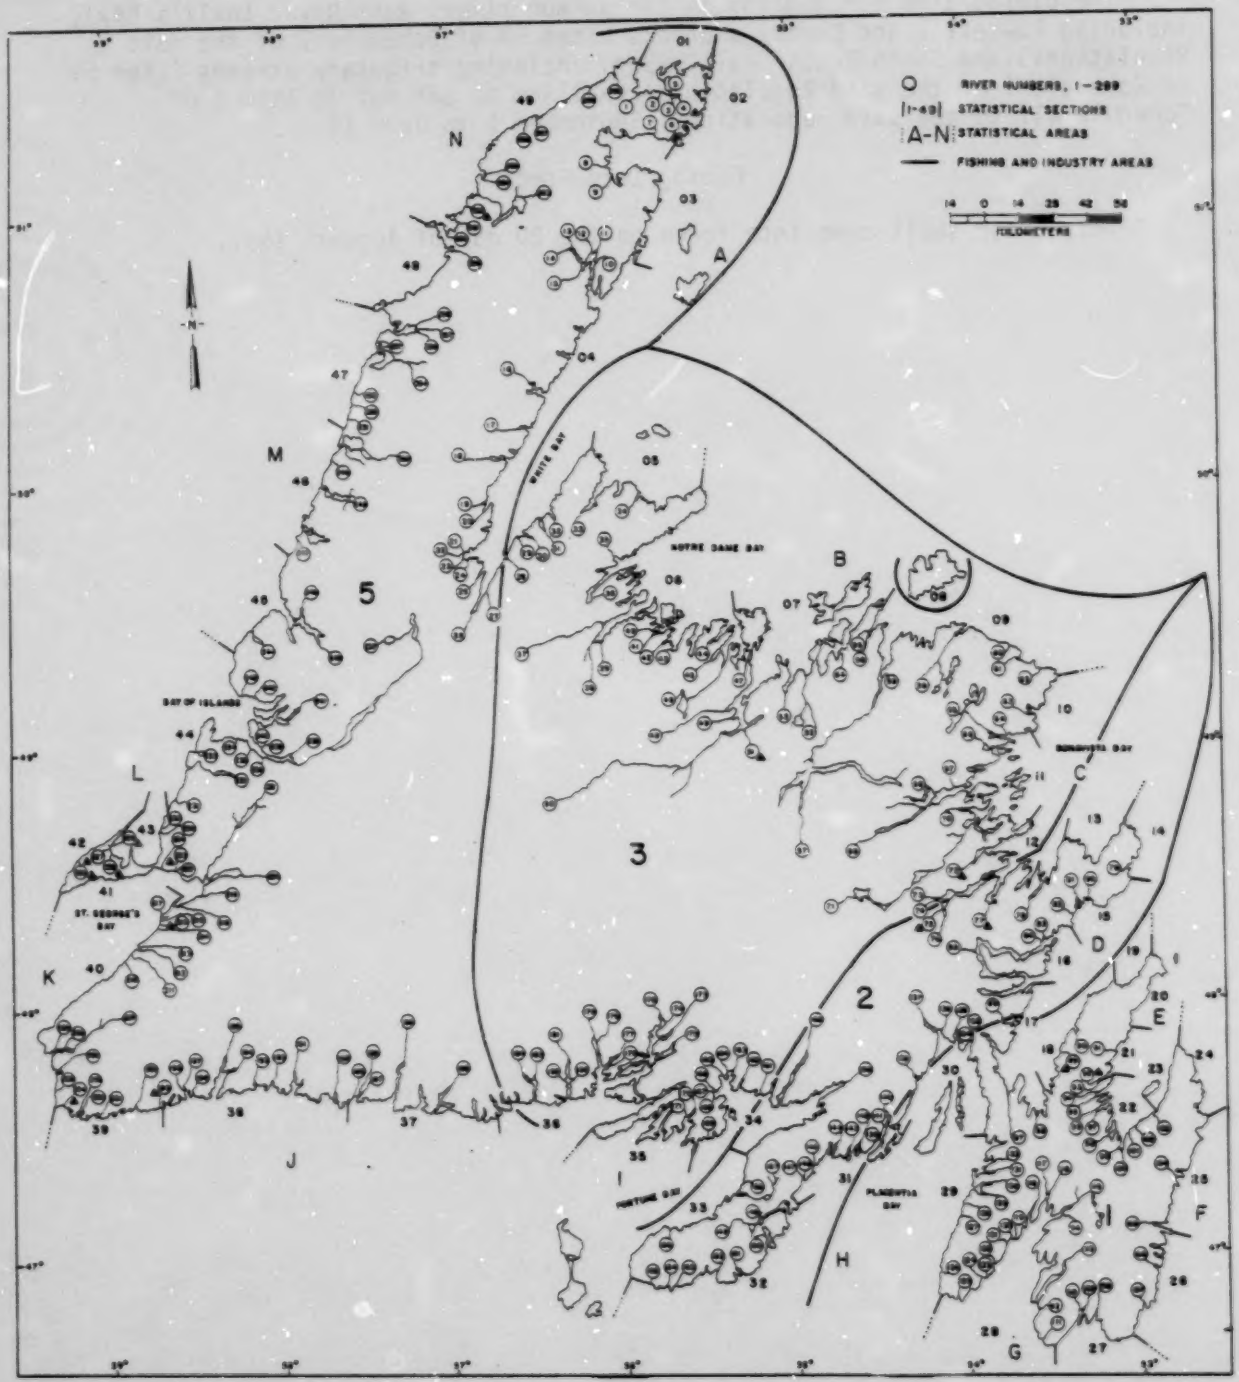

Fig. 1. Location of rivers in insular Newfoundland with existing and historic (A) Atlantic salmon populations. Boundaries of Fishing and Industry areas, statistical areas and statistical sections are also indicated.

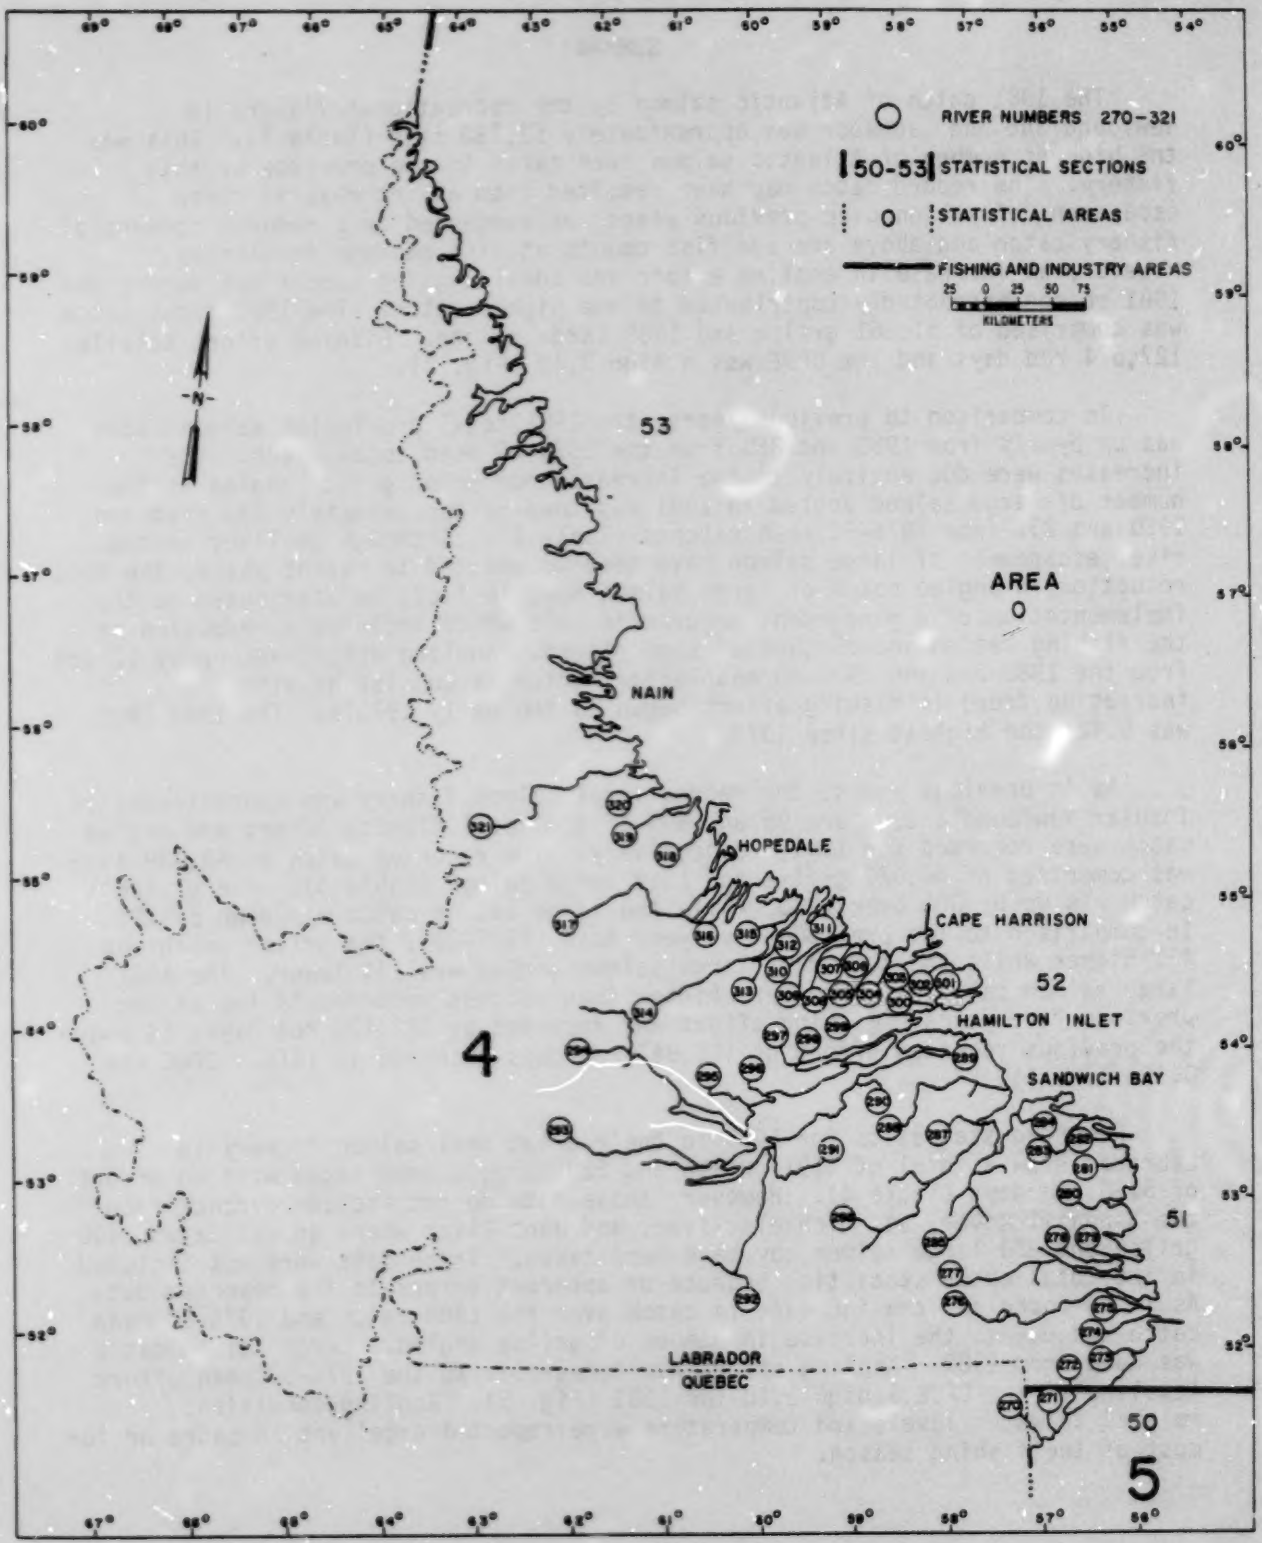

Fig. 2 Location of rivers in Labrador with existing Atlantic salmon populations. Boundaries of Fishing and Industry areas, statistical areas and statistical sections are indicated.

SUMMARY

The 1981 catch of Atlantic salmon by the recreational fishery in Newfoundland and Labrador was approximately 53,750 fish (Table 2). This was the highest number of Atlantic salmon ever taken in the province by this fishery. The record catch may have resulted from an increase in river escapement of salmon over previous years, as suggested by a reduced commercial fishery catch and above average fish counts at fish passage facilities. However, an increase in angling effort and ideal angling conditions during the 1981 season undoubtedly contributed to the higher catch. The 1981 total catch was comprised of 51,861 grilse and 1889 large salmon. Fishing effort totalled 127,674 rod days and the CPUE was a high 0.42 (Fig. 3).

In comparison to previous years, the 1981 total provincial salmon catch was up by 27% from 1980 and 36% from the 1976-80 mean total catch. The increases were due entirely to the increased number of grilse angled as the number of large salmon angled in 1981 was down by approximately 33% from the 1980 and 23% from 1976-80 mean catches (Table 2). Although declines in the river escapement of large salmon have been documented in recent years, the 1981 reduction in angled catch of large salmon may, in fact, be attributed to the implementation of a management program in 1978 which included a reduction in the fishing season and closure of some rivers. Angling effort was up by 17-18% from the 1980 and the 1976-80 mean effort which is consistent with the increasing trend in fishing effort begun in the early 1970's. The 1981 CPUE was 0.42; the highest since 1973.

As in previous years, the recreational salmon fishery was concentrated in insular Newfoundland, where 96 and 89% of the total fishing effort and angled catch were recorded for 1981, respectively. The recorded catch of 48,039 fish was comprised of 46,670 grilse and 1369 large salmon (Table 3). The grilse catch was up by 30% over 1980, while the large salmon catch was down by 29%. In comparison to the previous five year mean (1976-80), the grilse catch was 42% higher while the number of large salmon angled was 13% lower. The 1981 large salmon catch was, however, higher than catches recorded in two of the previous five years. Fishing effort was recorded as 122,476 rod days; 6% above the previous recorded effort of 115,847 rod days observed in 1976. CPUE was 0.39 (Fig. 4).

Recorded statistics for 1981 in the recreational salmon fishery in Labrador show a total of 5191 grilse and 520 large salmon taken with an effort of 5198 rod days (Table 4). However, these data do not include catches from the Sandhill River, St. Michaels River, and Hunt River where an estimated 1400 grilse and 250 large salmon may have been taken. These data were not included in the total catch statistics because of apparent errors in the reported data. As in Newfoundland the increase in catch over the 1980 catch and 1976-80 mean catch was due to the increase in number of grilse angled. Large salmon catch was down from 1980. Angling effort was comparable to the 1976-80 mean effort levels with the CPUE a high 1.10 for 1981 (Fig. 5). Angling conditions, related to water levels and temperature were reported excellent in Labrador for most of the fishing season.

ACKNOWLEDGMENTS

We thank the field staff of Resource Management Branch for collecting the data, Economics Branch for assistance in data processing, H. Mullett for drafting figures, A. Chaytor for key punching, K. Harding and P. Doyle for typing and also the editors T.R. Porter and M. O'Connell.

Table 1. Periods of salmon angling for all scheduled rivers in Newfoundland and Labrador, 1981.

Rivers	Period
Conne River & tributaries	June 10-Aug. 31
Garnish River & tributaries	June 10-Aug. 31
Southwest & Bottom Brook	June 20-Aug. 31
Flat Bay Brook & tributaries	June 20-Aug. 31
Fox Island River & tributaries	July 4-July 17
Little Codroy River and tributaries	July 1-Aug. 15
Little Barachois Brook & tributaries	July 1-Aug. 15
Harry's River & tributaries	July 1-Aug. 15
Serpentine River & tributaries	July 1-Aug. 31
Humber River Downstream from Deer Lake	June 20-Aug. 31
Upper Humber River, Deer Lake to source	June 10-Aug. 31
Highland River & tributaries	
Cook's Brook	
Hughes Brook	No
Torrent River & tributaries	Open
Watson's Brook, St. Barbe	Season
Anchor Brook	
Deadman's Bay River & tributaries	
Tides Brook, Mortier Bay & tributaries	
Other scheduled salmon rivers in Insular Newfoundland	June 20-Aug. 31
Scheduled salmon rivers in Labrador	June 20-Sept. 15

Table 2. Angled catch, effort and catch per unit effort of Atlantic salmon in Newfoundland and Labrador, 1953-81. Five-year means and standard deviations are included.

Year	Effort (rod days)	Grilse (<2.7 kg)	Salmon (≥2.7 kg)	Total catch	CPUE	Percent grilse

(Labrador only)

INTRODUCTION

At present, the Department of Fisheries and Oceans, Newfoundland Region, do not collect or compile statistics on the recreational fishery of fish species in insular Newfoundland other than Atlantic salmon. Some data from previous years are available but to date, due to their dubious quality, they have not been published. Recently, some effort has been made to collect catch and effort data for all fish species from commercial sport fishing camps in Labrador (Fig. 6) but with limited success. Some previous data on these fisheries are to be published in a report on the rivers of Labrador by Anderson (in prep.) and the data that are available for 1981 are included in this report.

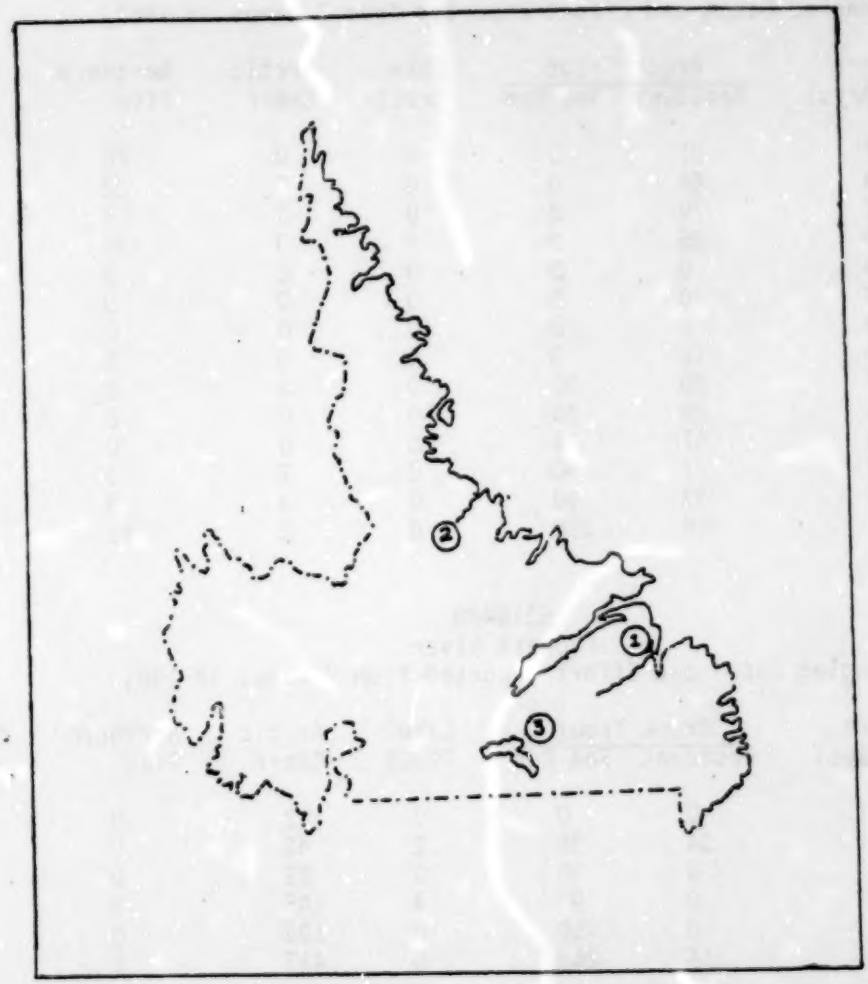

Fig. 6. The location of commercial sport fishing camps where data for species other than Atlantic salmon were collected. 1. - Eagle River, 2. - Flowers River, 3. - Ann Marie Lake
